MARDECO M-SERIES REFINED SLIDING DOOR HARDWARE

About Mardeco International

Mardeco International Ltd. is a privately owned company based in Auckland, New Zealand, specializing in importing and exporting high-quality architectural hardware. For over 23 years, we've connected global designs with industries worldwide, working with kitchen and furniture manufacturers, hardware wholesalers, retailers, architects, interior designers, and homeowners.

Our products have been selected for projects across New Zealand, Australia, the UK, Europe, South Africa, Mexico, the USA, and the Pacific Islands, reflecting our commitment to quality and reliability.

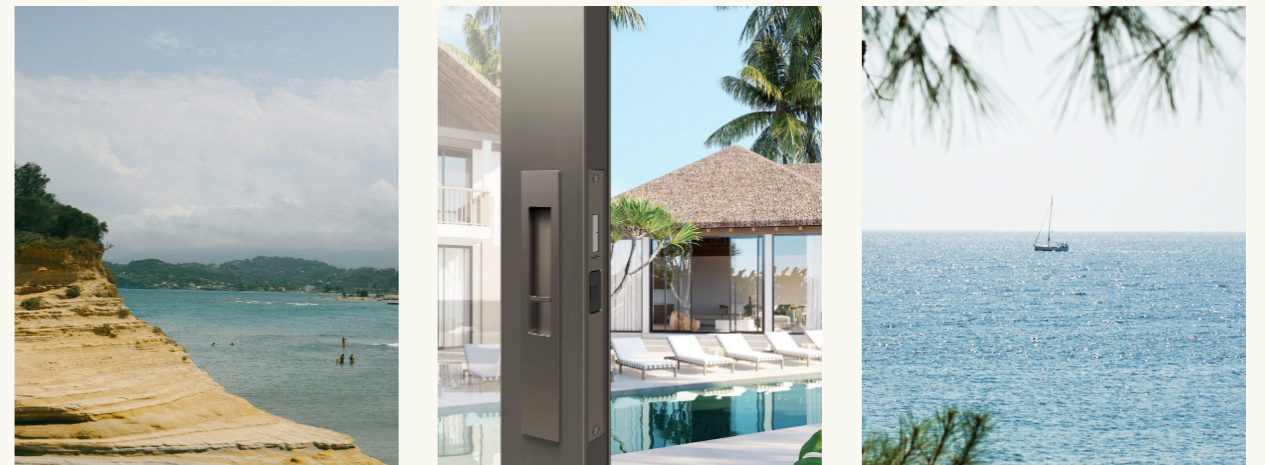

At Mardeco, we are driven by innovation. Our team has developed key products such as the M-Series sliding door hardware and S-Line handrail brackets, designed to meet the practical and aesthetic needs of modern spaces. In addition, we offer a range of trusted imported products, including Mardeco kitchen and cabinet hardware, JNF architectural hardware, CL cabinet locks, and Groël door handles.

At Mardeco, we believe in balancing great design with dependable service. We aim to help clients find the right products exactly when needed, ensuring every project is completed smoothly and stylishly.

Mardeco: Practical solutions, thoughtful design, and reliable service bringing global hardware to local spaces.

“Form follows function”

Lois Henry Sullivan

American Architect (1856 - 1924)

The quote means that the shape and design of a building or object should be primarily based on its intended purpose and function, rather than on aesthetic considerations alone.

Uncompromising Simplicity

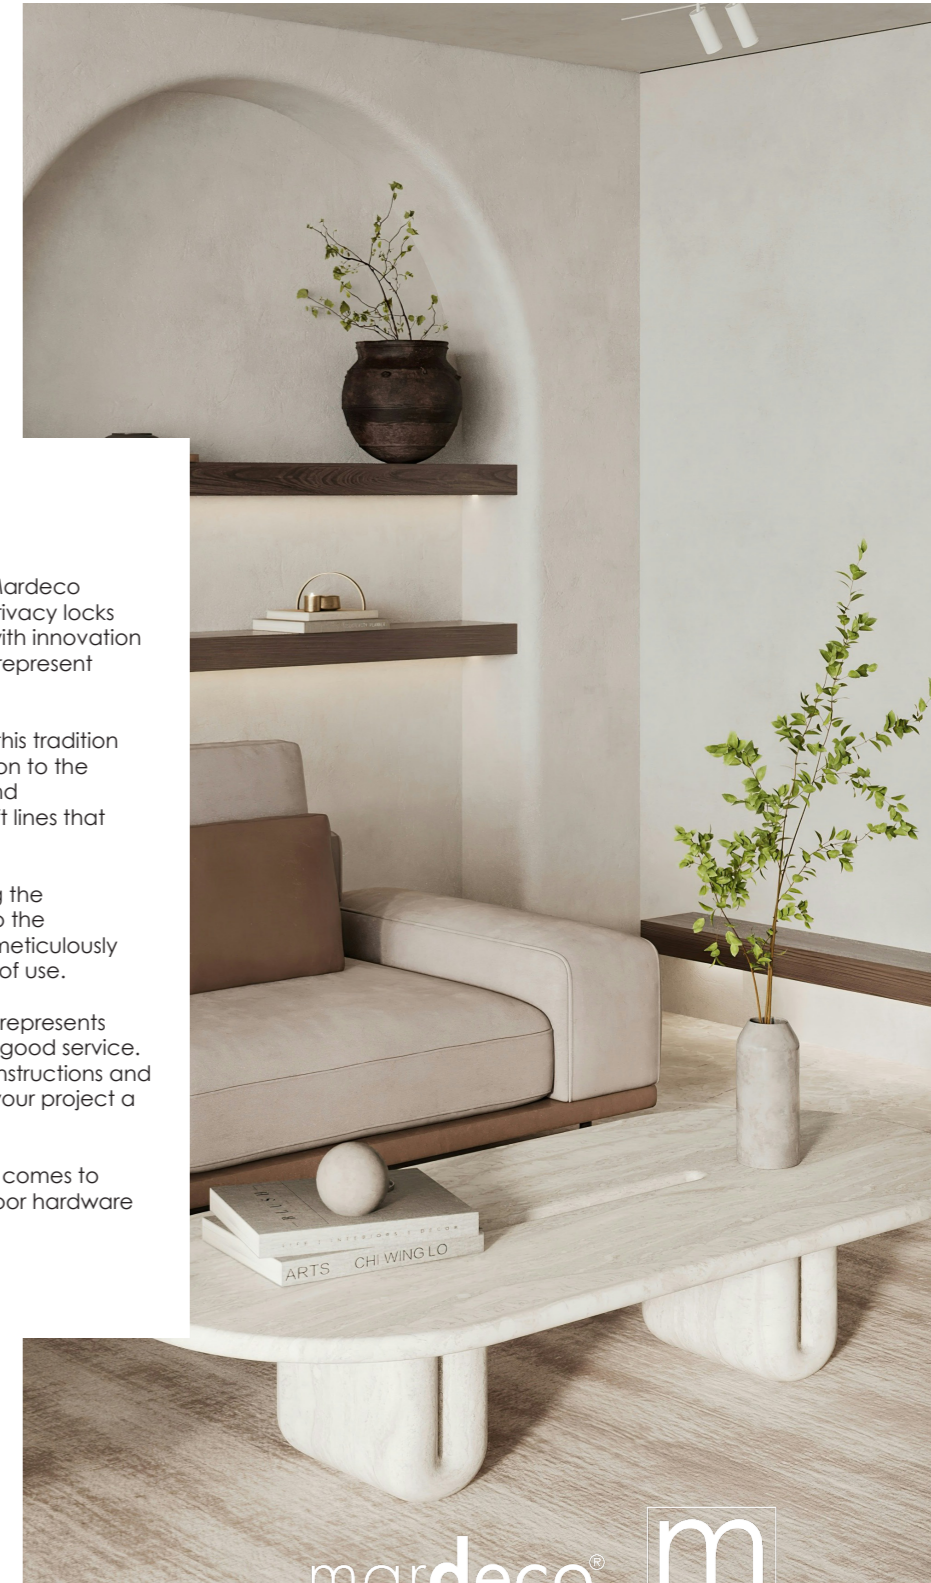

The M-Series range of sliding door hardware by Mardeco represents a new age of flush pull handles and privacy locks for timber and aluminium sliding doors. Packed with innovation and sophistication, these sleek, modern handles represent simplicity through uncompromising design.

The new Mardeco 9000 Oval M-Series continues this tradition with its elegant and traditional design. This addition to the M-Series range offers a seamless blend of style and functionality, incorporating a classic style with soft lines that make it a perfect choice for any project.

Mardeco has left no stone unturned in perfecting the M-Series range. Every aspect, from the handles to the installation resources and packaging, has been meticulously designed to ensure the highest quality and ease of use.

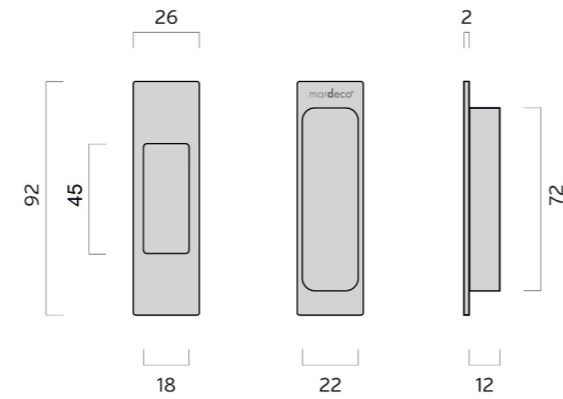

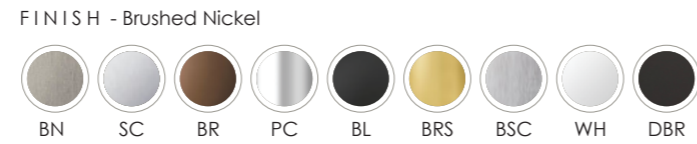

Designed in New Zealand, the M-Series perfectly represents what Mardeco is all about... quality, design, and good service. M-Series hardware includes detailed installation instructions and additional parts for multiple applications, giving your project a cohesive look.

There are so many decisions to be made when it comes to fitting out a project, yet deciding which sliding door hardware to choose is easy with the M-Series by Mardeco.

The Design Story Behind the M-Series Range by Mardeco

A leading supplier of designer architectural hardware, Mardeco International approached Blender to create a new range of cavity slider hardware. With a huge gap between the top-end products and the cheap, often badly made flush pulls, Mardeco was keen to create a high-quality product without the enormous price tag.

The challenge was designing a product that was versatile enough to handle different types of doors and set itself apart from the many other flush pulls on the market.

M-Series Packaging & Products

Starting with preparing a design brief with the client, the team brainstormed and sketched a range of fresh ideas before developing the strongest ones for customer feedback. Once these ideas were refined and the design direction was set, Blender used the latest 3D CAD tools to create an accurate virtual product model and further develop the finer technical and design details. Using 3D CAD software with a unique modelling technique allowed changes to be made quickly and efficiently along the way. With the latest prototyping technology available, Blender was able to build and test the product quickly throughout the development process. They are leaders in the industry regarding speedy prototyping and testing.

Attention to detail had to be incredibly high for a seemingly simple product. Once a final prototype was built and approved, Blender approached the overseas-based manufacturer.

Blender worked closely with the manufacturer to make final design improvements, improving quality and reducing cost. This guaranteed the best possible product and helped Mardeco reach its goal of creating an affordable product.

Timeless yet modern, simple yet advanced, the new Mardeco m-series range of cavity slider hardware is unique in several ways. It can be used on wooden and aluminium doors of different thicknesses and has interchangeable parts, meaning it can suit a number of different back sets.

Sleek and smooth, it feels like it was made for your hand. The unique lock mechanism looks great and features a fantastic positive locking action. The m-series is exactly what customers have been looking for, as evidenced by the overwhelmingly positive feedback.

Blender also designed instruction manuals, installation videos, packaging and point-of-sale displays for the product.
