Company Overview

For over 40 years, the name Dynex has been synonymous with high-quality glazing seals.

From humble beginnings as a small start-up with a single extruder in 1977, Dynex is now one of the largest extruded plastic profile manufacturers in New Zealand. As part of the international Aliaxis group of companies, Dynex has developed to become truly world-class, and the operation in Avondale now includes in-house PVC compounding, profile extrusion and distribution.

Dynex also has a distribution centre in Christchurch, and has a customer base throughout New Zealand, Australia and the South Pacific.

Dynex is proud to work with key partners in the glazing and aluminium joinery industry, and has developed many custom profiles for key customers over the years, providing expertise, design assistance, new technologies combined with great service and support.

Materials

PVC

- Cost effective, standard material
- Suitable for low-rise applications (single/double storey)
- Good UV resistance
- Good weathering resistance
- Not suitable against polycarbonate
- Recycled internally

TPV

- High-performance material
- Superior high and low temperature resistance, compression set resistance
- Superior weathering and UV resistance
- Suitable for three storeys and over
- Compatible with polycarbonate
- Able to be coextruded with polypropylene

Setting Blocks

- Material is a specific mixture of TPV with added polypropylene to increase hardness
- Hardness – Shore A 80 approximately

PVC Wedges
